

## Finance your solar installation and get cheaper energy from day one!

We supply a solar energy installation for your site, office, or other building including finance. (\*)

### Benefits:

- You pay less per month for your energy than you do now!
- Fixed price per month without any surprises!
- You pay towards an asset instead of paying to your energy company.
- No up-front investment needed.
- After the lease period you get 100% benefit from your solar production for another 10 years.
- Positive environmental impact.

### Example calculation:

For this example we use a special load tariff (SLT) client to explain your energy bill.

The below info you find on your energy bill:

- Energy charge	0.99GHC *
- Government levy	0.0117GHC
- streetlight levy	0.0176 GHC
- VAT	0.15 GHC
- Nhil	0.025 GHC
<b>Total cost per kWh now</b>	<b>1.19 GHC (\$0.21/kWh)</b>

When financing your solar plant , we can offer a lease to buy for approx. \$0.09/ kWh.

We can install around 45% of your total energy request. In the mix, Solar and grid we bring back your total energy cost per kWh to **±\$0.14/kWh**, instead of \$0.21. This is a saving of 25% on your energy bill.

For a consumption of 500.000kWh/year the saving will be around \$18.000/ year without any investment.

\*We are in the process of getting all funds in place from external financiers.
